## ACHIEVEMENTS

Throughout my academic journey, I've engaged in diverse software development projects, applying various technologies and methodologies.

### ● Examify – Online Exam Platform

Built a full-stack web application using Spring Boot and React.js. Implemented JWT authentication and managed state with Redux. Stored data in MongoDB.

### ● NikosGPT – AI Chatbot

Developed a Python chatbot with basic NLP logic to interact with users. Focused on prompt parsing and conversational design

### ● Blockchain-based Crowdfunding Platform

Designed a decentralized app using Solidity smart contracts and Ethereum. Built frontend in React.js and ensured transparent funding workflows.

### ● Foodverse – Cross-Platform Food Delivery Application

Collaborated on the development of a Java Swing-based desktop application for food ordering. Focused on UX and smooth cross-platform functionality. (<https://github.com/food-verse/foodverse>)
